

JUL 20 1982

WHEREAS, the Orange County Board of County Commissioners intends to operate its water and wastewater system in the most efficient and effective manner, and

WHEREAS, the Orange County Board of County Commissioners realizes the need for adequate planning in order to achieve such efficiency and effectiveness

NOW, THEREFORE, BE IT RESOLVED that the Board of County Commissioners adopts the following statement of goals and objectives in order to guide the planning processes for their water and wastewater system.

1. The private sector shall be required to provide, in advance, capital funds for construction and/or expansion of water/wastewater improvements, in order to meet the demand imposed by new growth.
2. The County shall comply with the U. S. District Court Consent Decree.
3. The County will consider the environmental and facilities goals and objectives established in the Orange County Growth Management Policy.
4. The County will promote the use of subregional water and wastewater treatment plants wherever financially and/or environmentally desirable.
5. The County will secure, whenever possible, federal funding for the construction of water/wastewater facilities; however, such funds will not be a prerequisite to the provision of adequate water and wastewater system capacity throughout appropriate areas of the County.
6. The County will comply with all applicable Florida Department of Environmental Regulation and U. S. Environmental Protection Agency standards and regulations relating to water/wastewater facilities.
7. The County will coordinate planning for the provision of water/wastewater service with other municipal water/wastewater systems, in order to prevent duplication of effort and fragmentation of systems.
8. The County shall plan, manage and construct water/wastewater systems, in order to provide the lowest possible rates to system users.
9. Orange County will manage and operate the water/wastewater system as a single entity.
10. The County will encourage, as a major consideration, the conservation of water and, as such, will design and construct plant and effluent disposal systems that are consistent with this goal.

ADOPTED THIS 20th DAY OF July, 1982.

ATTEST:

BOARD OF COUNTY COMMISSIONERS
OF ORANGE COUNTY

Mary J. Garrison
Clerk to the Board of County
Commissioners
