

The Residents of Westfield, Amberleigh and Orange Cove that reside in the backyard of West Orange High School firmly believe that a school is an asset to any community. We have co-existed peacefully with West Orange High School for almost twenty years. However, due to the overcrowding of West Orange High School, our two lane roads are congested twice daily and we now have numerous safety concerns for our developments that would not be an issue if the County Commission had worked with the Orange County School Board on a relief school in a timely manner.

We also feel that it is unfortunate that the complaints of a small minority of homeowners are being put above the educational needs of thousands of students.

We the undersigned have just as much right to be heard as those who don't want a school in their "back yard" and demand that the County Commission take the necessary steps to cooperate with OCPS to get a relief school built in west Orange County.

The Residents of Westfield, Amberleigh and Orange Cove that reside in the backyard of West Orange High School firmly believe that a school is an asset to any community.

We have co-existed peacefully with West Orange High School for almost twenty years. However, due to the overcrowding of West Orange High School, our two lane roads are congested twice daily and we now have numerous safety concerns for our developments that would not be an issue if the County Commission had worked with the Orange County School Board on a relief school in a timely manner.

We also feel that it is unfortunate that the complaints of a small minority of homeowners are being put above the educational needs of thousands of students.

We the undersigned have just as much right to be heard as those who don't want a school in their "back yard" and demand that the County Commission take the necessary steps to cooperate with OCPS to get a relief school built in west Orange County.
