

Good Afternoon,

Thank you for your consideration of the siting of the West Orange Relief High School.

We need to work together to build this school now. The judge has cleared the way for its construction on the Beck Site and I fully support that location. Any discussion of other sites at this point is insanity.

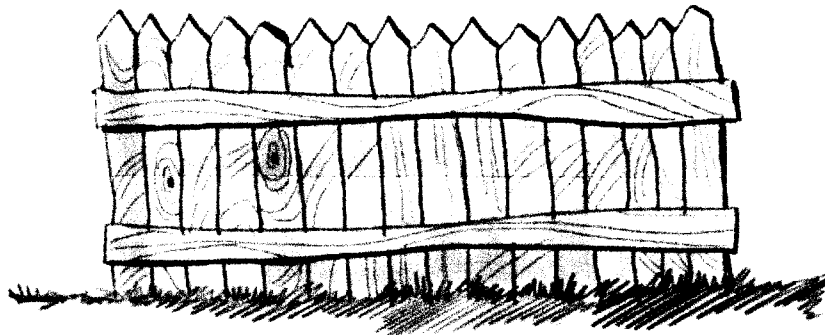

I would prefer the OCPS plan "a" as it keeps the campus one entity. Best for traffic, best for students and therefore best for the majority of citizens.

I am a proud West Orange parent and volunteer. I drive past the Beck site each time I drive to WOHS. I reject the concerns about increased traffic through the intersection as it will now become my destination rather than a through-point.

The opposition groups have made it abundantly clear that they don't want the school in their backyard. I understand; change is hard. West Windermere is changing; Orange County is changing; growth and development effect us all.

Please help our community heal. Plan "a" offers an eight foot tall precast concrete wall along the north and east property lines.

Good Fences Make Good
Neighbors

I will ultimately be pleased with any solution that allows a relief High School on the Beck site; although I prefer the OCPS plan "a".

Thank you again for your consideration.
